28-03-2025 Tasks

1. Header Implementation

Use Case: Utilize the OOTB (Out-Of-The-Box) Header Component and configure navigation with the following menu items:

- **News** (Dropdown containing 5 news articles)

- **About Me**

- **Contact Me**

- **Homepage**

Implementation Steps:

1. Navigate to /content/experience-fragments/us/en/newsroom/header.

2. Configure the OOTB Navigation Component with the following menu structure:

   o **News** (Dropdown with 5 article links) → /content/news

   o **About Me** → /content/us/en/about

   o **Contact Me** → /content/us/en/contact

   o **Homepage** → /content/us/en/home

3. Apply CSS to ensure proper visual styling.

---

2. Footer Implementation

Sections to Include:

- **About Me** (Text Component)

- **Contact Me** (Text Component)

- **Latest 5 News** (List Component with clickable links opening in a new tab)

- **Social Media Links** (List Component)

Implementation Steps:

1. Create an Experience Fragment at /content/experiencefragments/us/en/newsroom/footer.

2. Add **Text Components** for "About Me" and "Contact Me."

3. Configure a **List Component** to dynamically pull the latest 5 news articles from /content/news.

4. Add a **List Component** for social media links.

3. Home Page Implementation

Requirements: Utilize the OOTB Content Page Template and add a **Teaser Component** to showcase award ceremonies.

Teaser Component Configuration:

- **Image**
- **Title**
- **Description**
- **CTA Button** linking to an award details page

Implementation Steps:

1. Navigate to /content/us/en/home and create a page using the **OOTB Content Page Template**.

2. Drag and drop a **Teaser Component**, then configure it with:

   - **Award Image**
   - **Title & Description**
   - **CTA Button** linking to the full award details page

---

4. News Page Implementation

Create a Custom NewsRoom Component with the following functionalities:

- Accept a **News Page Path** as an authored property.
- Fetch all news articles under /content/news.
- Display articles as **cards**, each containing:

  - **Title**
  - **News Details**
  - **Image**

Implementation Steps:

1. **Develop the NewsRoom Component:**

   - Retrieve child pages under /content/news.
   - Extract **title, image, and text** from each news page.
   - Display them in a **grid format**.

2. NewsRoom Component Model (NewsRoomModel.java)

java

CopyEdit

```java
@Model(adaptables = SlingHttpServletRequest.class, defaultInjectionStrategy =
DefaultInjectionStrategy.OPTIONAL)
public class NewsRoomModel {

    @Inject
    private Resource resource;

    @Self
    private SlingHttpServletRequest request;

    private static final Logger LOG = LoggerFactory.getLogger(NewsRoomModel.class);

    public List<NewsArticle> getNewsArticles() {
        List<NewsArticle> articles = new ArrayList<>();
        Resource newsParent = request.getResourceResolver().getResource("/content/news");

        if (newsParent != null) {
            for (Resource newsPage : newsParent.getChildren()) {
                ValueMap properties = newsPage.getValueMap();
                String title = properties.get("jcr:title", String.class);
                String image = properties.get("image", String.class);
                String text = properties.get("text", String.class);

                if (title != null && image != null && text != null) {
                    articles.add(new NewsArticle(title, image, text));
                }
```

```
      }

    }

    return articles;

  }

}
```

3. **HTL for NewsRoom Component (newsroom.html)**

html

CopyEdit

```html
<div class="news-room">

  <h2>Latest News</h2>

  <div class="news-grid">

    <sly data-sly-list.article="${newsRoomModel.newsArticles}">

      <div class="news-card">

        <img src="${article.image}" alt="News Image">

        <h3>${article.title}</h3>

        <p>${article.text}</p>

      </div>

    </sly>

  </div>

</div>
```

4. **Create Individual News Articles (/content/news/article-1.html)**

   o   Use **Text, Image, and Title Components** for each article's content.

---

5. About Me Page Implementation

Component to Use: Journalist Component

Implementation Steps:

1. Navigate to /content/us/en/about and create the page.

2. Use the **Journalist Component** to display:

- o **Profile Image**

- o **Biography**

- o **Notable Achievements**

---

6. Contact Me Page Implementation

Components to Use: Text or Teaser Components for Contact Details

Implementation Steps:

1. Navigate to /content/us/en/contact and create the page.

2. Add **Text Components** for:

   - o **Phone Number**

   - o **Email Address**

   - o **Office Address**

3. Use a **List Component** to include Social Media Links.

---

7. Applying Header and Footer at the Template Level

To ensure **all pages inherit the same Header & Footer**, add them at the **template level**.

Implementation Steps:

1. Open the **Page Template** (book-page-template).

2. Drag & Drop the **Header XF** at the top of the template.

3. Drag & Drop the **Footer XF** at the bottom of the template.

4. Save and roll out the template changes.

---

8. Using Different Templates

- **Homepage:** Utilize the **OOTB Content Page Template**

- **News Pages:** Use a **Custom Book Page Template**

OUTPUT:
